

OFFICIAL PLAN FOR THE RENUMBERING OF CITY OF EDMONTON

NOTE:
Avenues run East and West and Streets run North and South. 20 ft. is taken as a standard space for a house number, and 10 ft. in the business district. In finding a house you are always working from the South and East. The even house numbers are on the North side of Avenues and on the West side of Streets.
For example given the address 1321-133 Ave. The preceding 1321 indicates that the house in question is in the block between 132 St. & 133 St. while the last two figures 21 are the actual house number.
To find the address given above take the 131 Ave. (Wagner Ave.) and get off at 132 St. and go north two blocks to 133 Ave. The house is between 132 St. & 133 St. as stated above.
Second example given the address 9412-116 Ave.
To find this address take the 116 Ave. (Alberta Ave.) and get off at 94 St. and go west two blocks to 116 Ave. The house is in the block between 94 St. & 95 St.
The key to this system is that in the house numbers in all cases the numbers preceding the last two figures designate the name or number of the intersecting highway from which the house takes its number.
